

## Keeping the Critters Out

**Protect your technicians by blocking the propane dome opening with the ProDomeSeal.**

A propane tank dome is the perfect home for birds, squirrels and other small critters. Besides being a nuisance, bird droppings and critter debris are known to carry up to 60 transmittable diseases including salmonella and histoplasmosis. The ProDomeSeal secures the opening of the protective dome while allowing the necessary copper supply lines to pass through the flexible center seam.

### **ProDomeSeal Features:**

- **Easy to install in under 5 seconds** ☑
- **Fits most 250, 500, and 1,000-gallon propane tank lids with an opening of 3" width and 4" height**
- **Made from flexible PVC rubber**
- **UV resistant for long life** ☑
- **An inexpensive solution to a common problem** ☑
- **Proudly Made in the U.S.A**
- **Available in 3 colors Gray, White, and Orange**
